1. Introduction The concept of risk and risk assessments has a long history. More than 2400 years ago the Athenians offered their capacity of assessing risk before making decisions (Bernstein, 1996). However, risk assessment and risk management as a scientific field is young, not more than 30-40 years old.

Project accounting is a specialised form of accounting that corresponds to the ever-evolving needs of project delivery, which helps adequately track, report and analyse financial results and implications. This includes the practice of creating financial reports specifically designed to track the financial progress of projects, which can then be used by managers to aid project management.
