### **Animals In Winter**

Food is hard to find in the winter. Some animals, like squirrels, mice and beavers, gather extra food in the fall and store it to eat later. Some, like rabbits and deer, spend winter looking for moss, twigs, bark and leaves to eat. Other animals eat different kinds of food as the seasons change.

### **Animals in winter - Hibernation, Migration and Adaptation**

Nice little story to help younger kids understand how animals adapt to the changing winter temperatures. It also has a section at the end that talks about different ideas about how you can feed animals (birds, squirrels) in the winter.

Animals In Winter Lesson. In the winter, the temperatures plummet, the snow blankets the ground, the trees and bushes are stark and bare. People bundle up in coats, boots, gloves, and scarves if they have to leave the warmth of their homes. Hot chocolate, warm soups, and comfort foods keep them warm and nourished. This is the human winter survival plan.

We've written about how the world around us changes during the winter, but that's not the only thing that changes; throughout the animal kingdom, birds and beasts that live in colder climates have special adaptations to help them survive the winter's harsh weather. The animals in some of these photos may look like they're freezing, but that's not 100% certain - in most cases, the photographers are probably colder than the animals that they've photographed.
