By Rocket to the Moon. First published in English in 1931, this novel for young adults is an accurate mirror of many of the space travel concepts that have been discussed by pre-war European experts. The author's imaginative theories about the history of the Earth—many of which presage those of Velikovsky and von Daniken—are explored,...

Rocket to the moon! takes us back in time to when we, of course, landed on the moon, but in such a fresh and fun way! I was literally sharing interest facts with my husband as I read through this comic-like children's book! Such as the shuttle held 950,000 gallons of fuel and used up 500,000 gallons of it within the first two and a half minutes!
