Psychology is the science of behavior and mind (not to be confused with neuroscience, which studies the neural underpinnings of psychological phenomena ex. neural circuits). Psychology includes the study of conscious and unconscious phenomena, as well as feeling and thought. It is an academic discipline of immense scope. Psychologists seek an understanding of the emergent properties of brains ...

Question: How do I cite an article which is cited in the article I am using? Answer: According to page 178 of the APA Manual, 6th edition, citation of a work discussed in a secondary source (e.g., for a study by Seidenberg and McClelland cited in Coltheart et al.) should be used sparingly. Give the secondary source in the reference list; in text, name the original work, and give a citation for ...

Delusional Disorder | Psychology Today

[p. 370] I. INTRODUCTION. In a previous paper various propositions were presented which would have to be included in any theory of human motivation that could lay claim to being definitive. These conclusions may be briefly summarized as follows: 1. The integrated wholeness of the organism must be one of the foundation stones of motivation theory.
