Computational science and engineering (CSE) is a relatively new discipline that deals with the development and application of computational models and simulations, often coupled with high-performance computing, to solve complex physical problems arising in engineering analysis and design (computational engineering) as well as natural phenomena (computational science).

Note: The majority of this program must be completed on campus for degree completion. The Institute for Computational and Mathematical Engineering (ICME) is a degree granting institute at the intersection of mathematics, computing, engineering and applied sciences. iCME designs state-of-the-art mathematical and computational models, methods, and algorithms for engineering and science ...
