### **Pathology Outlines - Jobs**

Highlights the face-to-face NCTSN Advisory Board meeting, showcases a few of our Category III sites and the outstanding work they are doing in their centers, and discusses the impact deployment has had on one Network family, as well as other stories.

### **NCTSN Resources | The National Child Traumatic Stress Network**

Trauma-informed care (TIC) involves a broad understanding of traumatic stress reactions and common responses to trauma. Providers need to understand how trauma can affect treatment presentation, engagement, and the outcome of behavioral health services. This chapter examines common experiences survivors may encounter immediately following or long after a traumatic experience.

### **Understanding the Impact of Trauma - Trauma-Informed Care in Behavioral Health Services - NCBI Bookshelf - National Center for Biotechnology Information**

Trauma — the blanket term for any physically or psychologically damaging experience — is sadly common in our society. According to the National Center for PTSD, roughly 60% of men and 50% of women will experience at least one traumatic event during their lifetimes. Trauma can cause a wide range of long-lasting, negative health effects, including insomnia and other sleep-related problems.
