### **Philosophical Explanations**

In philosophy, a razor is a principle or rule of thumb that allows one to eliminate ("shave off") unlikely explanations for a phenomenon, or avoid unnecessary actions.. Razors include: Occam's razor: Simpler explanations are more likely to be correct; avoid unnecessary or improbable assumptions.; Grice's razor: As a principle of parsimony, conversational implications are to be preferred over ...

The Origin of Selfhood: A Functionalist Account Based on the Predictive Processing Paradigm.  
Speaker: Zong Ning From: The University of Tokyo URL: Abstract: In this paper I examine the notion of selfhood through the lens of the predictive processing paradigm. I argue that an agent's individual existence is essentially associated with the reflexive capacity of information processing, or ...

1. Economic: Concept that a government should not try to control prices, rents, and/or wages but instead let open competition and forces of demand and supply create an equilibrium between them that benefits the vast majority of citizens. It differs from the doctrine of laissez faire in its acceptance of the government intervention to control creation and spread of monopolies and in ...

ambiguity. The presence of two or more distinct meanings for a single word or expression. In itself, ambiguity is a common, harmless, and often amusing feature of ordinary language. When unnoticed in the context of otherwise careful reasoning, however, it can lead to one of several informal fallacies.. Example:"I'll give you a ring tomorrow." could signify either the promise of a gift
