We attempted to establish a new photorespiratory bypass that converts glycolate to CO₂ via three rice-self-originating enzymes. As illustrated in Figure 1A, in this bypass glycolate is first oxidized to oxalate in two steps by OsGLO3, an isoform of glycolate oxidase in rice that was shown to effectively catalyze the oxidation of both glycolate and glyoxylate (Zhang et al., 2012).

Engineering a New Chloroplastic Photorespiratory Bypass to ...

The Algorithmic Beauty of Plants was originally printed by Springer-Verlag in 1990 (second printing 1996). (See our list of known errors from the print version.)An electronic version has been produced using the original LaTeX files and digital illustrations. It is available in two versions: the original version is of higher quality, while the downsampled version is of low quality, but has a ...

Remember the User. The users are typically you, your family, the family pets, and visitors, and each have their own needs. There are five things to consider: 1) how do you currently use the yard, 2) how do you want to use the yard, 3) aesthetically, how do you want it to look, 4) what is your maintenance style, hands-off or hands-on, and 5) what is your budget.

BIOLOGY - University of Washington

The minimum bactericidal concentration (MBC) is the lowest concentration of an antibacterial agent required to kill a particular bacterium. It can be determined from broth dilution minimum inhibitory concentration (MIC) tests by subculturing to agar plates that do not contain the test agent. The MBC is identified by determining the lowest concentration of antibacterial agent that reduces the ...

Minimum bactericidal concentration - Wikipedia

Give your new plants a head start in life with properly prepared soil and the right amount of sunlight. You could do what a friend of mine did: She threw some topsoil on top of an unused wooden sandbox, let her 6-year-old choose the seeds (strawberries, green beans, watermelon) and watered ...

Photosynthesis is a process used by plants and other organisms to convert light energy into chemical energy that can later be released to fuel the organisms' activities. This chemical energy is stored in carbohydrate molecules, such as sugars, which are synthesized from carbon dioxide and water - hence the name photosynthesis, from the Greek φῶς, phōs, "light", and σύνθεσις ...

ATCC ® Normal Human Primary Dermal Fibroblasts from neonatal foreskin, when grown in Fibroblast Basal Media supplemented with Fibroblast Growth Kit components, provide an ideal cell system to propagate dermal fibroblasts in either serum-free or low serum conditions. The cells are cryopreserved in their first passage to ensure the highest viability and plating efficiency.

Vitamin A is Still a Vitamin. In a recent newsletter, Dr. John Cannel of the vitamin D council warned against taking cod liver oil as a source of vitamin D, because retinols - preformed vitamin A - interfere with the function of vitamin D. Dr. Cannel suggested obtaining omega-3 fatty acids from fish oils and vitamin A from carotenes. 4 Such advice elevates the status of vitamin D over ...
