Rheumatoid arthritis (RA) is a long-term autoimmune disorder that primarily affects joints. It typically results in warm, swollen, and painful joints. Pain and stiffness often worsen following rest. Most commonly, the wrist and hands are involved, with the same joints typically involved on both sides of the body. The disease may also affect other parts of the body.

Functional Movement Disorders (FMD) are commonly encountered in neurologic practice and mimic symptoms of other neurologic disorders, but can be diagnosed based on a typical history and features on examination. Many patients have a variety of abnormal movements including tremor, jerking movements, abnormal posturing of limbs, difficulties with walking and speech problems.

Clinical data. Limited data from a small randomized controlled trial (n=36) investigating burdock on inflammatory markers showed a significant improvement compared to baseline (but not compared to placebo) in serum interleukin (IL-6) and high sensitivity C-reactive protein in older adults with knee osteoarthritis who consumed 6 g/day of burdock root tea for 6 weeks (P=0.002 and P=0.003 ...
