Most avid gardeners don't check their love of plants at the front door. We keep ferns in the bathroom, begonias in the study, a dwarf citrus in the bedroom, pots of rosemary in the kitchen, and seedlings in the basement. Today there are so many interesting plants that can be grown indoors that there ...

1. Introduction. Soilless plant culture is any method of growing plants without the use of soil as a rooting medium (Savvas et al., 2013). This relatively simple definition encompasses a diverse range of plant growth systems which generally involves containerization of plant roots within a porous rooting medium known as a ‘substrate’ or ‘growing medium’.

Achieving environmentally sustainable growing media for ...
Intro to Growing Cannabis: Learn How to Grow Weed! Last updated 05/03/2018 (updated information about LEC grow lights). You’re here because you want to learn how to grow weed indoors and are interested in an “online class” about growing marijuana.

Deep Water Culture Hydroponics. Before starting your cannabis grow, you must decide if you want an indoor growing system or an outdoor growing system. When it comes to indoor growing mediums, DWC, or deep water culture, is a type of hydroponic growing method where each plant’s roots are growing in a tub of water. One of the main benefits of a DWC system is that it promotes faster growth.

Hydroponics is a subset of hydroculture, which is a method of growing plants without soil by instead using mineral nutrient solutions in a water solvent. Terrestrial plants may be grown with only their roots exposed to the nutritious liquid, or the roots may be physically supported by an inert medium such as perlite or gravel. The nutrients used in hydroponic systems can come from an array of ...

Plant Selection – For optimum results with oleanders, variety selection is a key factor. After identifying the variety best suited for the intended site, attempt to observe plants whenever possible prior to purchasing. Avoid plants labels as double white, single red, etc., and select only those that specify exactly which variety is offered for sale.

"Deep Water Culture" (commonly referred to as DWC) refers specifically to the type of hydroponics where plants grow with the roots stretching out into a tub of nothing but aerated nutrient-water. This roots-in-oxygenated-water setup is what gives Deep Water Culture its remarkable vegetative growth speed!
