Swing for Jython: Graphical Jython UI and Scripts ...

The Standard Python distribution (often called as CPython) has the Tkinter GUI library shipped with it. Other GUI libraries like PyQt and WxPython are also available for use with it, but the swing library offers a platform independent GUI toolkit. Using the swing library in Jython is much easier compared to using it in Java.

Swing itself is written in Java. Swing is available for other languages too. For example Jython, JRuby, Groovy, or Scala.

Introduction to Jython Swing - ZetCode

Using Java Swing with Jython is a lot of fun and makes it really easy to develop a nice UI in much less code than a similar Java app. All of the examples below work with Jython 2.2 and a 1.5 (or greater) JVM is strongly recommended. Many of these have been tested and will work using jdk/jre <1.5.

SwingExamples - JythonWiki - FrontPage - Python Wiki

I'm currently using Jython... have been using it for maybe 6 months now following years of Java. I love Jython's ability to call on all the Java classes, and also to ease the transition from a Java way of doing things to a Python way. But thinking about it I realise that by far the most common Java packages I'm using are the Swing ones.

python GUI compared to Swing? - Stack Overflow

Swing for Jython Jython UI and Scripts Development using Java Swing and WebSphere Application Server Robert A. Gibson

Swing for Jython - link.springer.com

Dave Briccetti shows how to create a simple Python program with a graphical user interface using Jython (Python running on Java) and Swing.
