In the field of extractive metallurgy, mineral processing, also known as ore dressing, is the process of separating commercially valuable minerals from their ores

Mineral processing - Wikipedia

Mining is the extraction of valuable minerals or other geological materials from the earth, usually from an ore body, lode, vein, seam, reef or placer deposit. These deposits form a mineralized package that is of economic interest to the miner. Ores recovered by mining include metals, coal, oil shale, gemstones, limestone, chalk, dimension stone, rock salt, potash, gravel, and clay.

Mining - Wikipedia

Branch of Inorganic Methods Development OSHA Technical Center Salt Lake City, Utah. Introduction . This method describes the collection of airborne hydrogen sulfide (H₂S) in the workplace on a silver nitrate (AgNO₃)-impregnated filter and analysis by differential pulse polarography (DPP).. History Previously, H₂S was collected in a midget impinger containing an alkaline suspension of ...
