

## *The Context Of The Phenomenological Movement*

### **The Context Of The Phenomenological**

Interpretative phenomenological analysis (IPA) is an approach to psychological qualitative research with an idiographic focus, which means that it aims to offer insights into how a given person, in a given context, makes sense of a given phenomenon. Usually these phenomena relate to experiences of some personal significance, such as a major life event, or the development of an important ...

Phenomenology (from Greek phainómenon "that which appears" and lógos "study") is the philosophical study of the structures of experience and consciousness. As a philosophical movement it was founded in the early years of the 20th century by Edmund Husserl and was later expanded upon by a circle of his followers at the universities of Göttingen and Munich in Germany.

In case of digital construction (DC) or 3D-printing with concrete, cementitious materials used for extrusion-based processes are inherently less flowable than vibrated ordinary concrete (OC) or self-compacting concretes (SCC); see Fig. 1. High static yield stress is necessary to assure the stability of the extruded layers after deposition by the printhead.
