A river flowing in its channel is a source of energy which acts on the river channel to change its shape and form. In 1757, the German hydrologist Albert Brahms empirically observed that the submerged weight of objects that may be carried away by a river is proportional to the sixth power of the river flow speed. This formulation is also sometimes called Airy's law.

Charles River Running Map. Thanks to Marathon Sports for the map.. Other recommended runs in Cambridge/Boston. My personal favorites run along the Emerald Necklace, including Olmstead Park, Jamaica Pond, and - if you're up for a long run - the Arnold Arboretum and Franklin Park. Some of the best urban green space running in Boston, and you don't have to drive or take the T to get to it!

A river crossing puzzle is a type of puzzle in which the object is to carry items from one river bank to another, usually in the fewest trips. The difficulty of the puzzle may arise from restrictions on which or how many items can be transported at the same time, or which or how many items may be safely left together. The setting may vary cosmetically, for example, by replacing the river by a ...
