The relationship between pot odds and odds of winning is one of the most important concepts in poker strategy. Pot odds are the ratio of the size of the pot to the size of the bet required to stay in the pot. For example, if a player must call \$10 for a chance to win a \$40 pot (not including their \$10 call), their pot odds are 4-to-1. To have a positive expectation, a player's odds of winning ...
